

Wanrun New Energy Storage

Wanrun New Energy stated that, as a leading cathode material supplier, the company closely follows the development needs of the solid-state battery industry and the mass production ...

Hubei Wanrun New Energy Technology Co.,Ltd. engages in the research and development, production, and sale and service of cathode materials and cathode materials for new ...

Breakthrough battery performance starts with innovative material systems More advanced cathode materials allow the electrochemical system to have greater energy.

Wanrun New Energy produces cathode materials and precursors for lithium-ion power batteries and energy storage batteries.

The demand for energy storage has increased on a large scale, and high-tech lithium batteries are expected to exceed 220GWh of energy storage lithium iron phosphate shipments this ...

As the demand for electric vehicles and renewable energy storage solutions continues to rise, this landmark deal between Wanrun and CATL signifies a major step forward in strengthening the supply ...

The implementation of the company's overseas investment project is in line with the development trend of the industry, enabling the company to equip overseas with production and ...

(Yicai) Sept. 24 -- Wanrun New Energy Technology's shares surged after the Chinese lithium-ion battery material supplier unveiled plans to invest USD168 million in building a new cathode material factory ...

Wanrun New Energy provides a diverse array of energy storage technologies, focusing predominantly on lithium-ion and emerging alternatives such as flow batteries and solid-state batteries.
