What is a solar boat?

A solar boat is exactly what it sounds like--a boat powered by the sun. Instead of relying on diesel or petrol engines, these boats use solar panels installed on the surface to capture sunlight and convert it into electricity using photovoltaic cells. That energy powers everything from the boat's motor to essential onboard systems.

Are solar electric boats quieter than gas boats?

Solar electric boats are much quieter than traditional gas-powered boats. This is because electric motors produce less noise than gas engines, which means that you can enjoy a peaceful, quiet ride on the water. This is not only enjoyable for you and your passengers, but it is also less disruptive to wildlife and other boaters.
